Strategic Fuels Blending Management and Technology

When: May 21, 2015 Free Webinar but seats are limited.

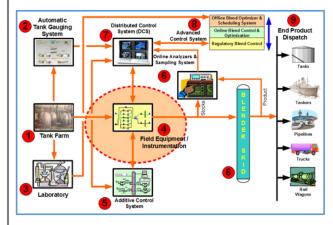

Time: 10 -11 AM CST (Houston, USA)

Register Now

In today's global economy of fluctuating crude oil prices, the worldwide refining industry is struggling. Costs are rising while refining volumes are decreasing. High fuel prices in recent years have reduced the global use, resulting in an oversupply of reserves. As a result, the volumes of crude oil being refined have decreased. For countries with government controlled fuel and crude oil prices, the diminished refining volumes become a critical issue.

The information imparted during this webinar will affirm the existing knowledge and increase learning and comprehension of fuel blending systems, thereby contributing toward efficient and economic management. The seminar will cover all technical, operational, modeling, and economical aspects of fuels blending control and optimization systems.

This webinar is also a preview of upcoming training seminar on the same topic in Dubai, UAE, April 21-23, 2015. For information and registration of 3 days' comprehensive training seminar, please click here.

What you will learn:

- An overview of fuels blending operations in terms of definition, modes, configurations, problems and challenges, etc.
- Brief overview of complexity of blending technology, models, optimization and systems implementation and integration

Who Should Attend:

The webinar is aimed at and is suitable for:

- Offsite Operations Managers
- Offsite Engineers / Operators
- Control System Engineers

Webinar Director:

Dr. Suresh Agrawal

President, Offsite Management Systems LLC

Dr. Agrawal has advanced degrees in Chemical Engineering from I.I.T's (India, USA). He has 30+ years of experience at senior technical / management positions with international companies and has successfully managed and executed many advanced refinery offsite operation automation projects in numerous countries. He has published and presented 30+ papers in international publications and conferences in the areas of refinery offsite operations automation. He has also acted as a consultant to a number of refining and process industries worldwide, and delivers training seminars in the areas of his expertise.
