

Tanks Farm Management

When:September 24, 2015Time:10 -11 AM CST (Houston, USA)

What you will learn:

- Tank gauging and inventory Management
- Oil movement and Control
- Fugitive emission
- Model based tanks Quality
- Custody Transfer
- Hydrocarbon Management (HM)

Who Should Attend:

The webinar is aimed at and is suitable for:

- Offsite Operations Managers
- Offsite Engineers / Operators
- Control System Engineers

Free Webinar but seats are limited.

Typical refinery tank farm consist of 100-300 tanks of large capacities to store crude oil and manufactured products. These are refinery assets of value of billions of dollars and they constantly move in and out of the tanks and/or plant almost 150-400 times in a day. It is very important for the refinery to know its inventory and quality in real-time. It requires efficient and safe tank farm management systems to manage, monitor, control and reconcile the material flow within and outside the perimeter of the tank farm.

This webinar will discuss all aspects of tank farm management with respect to custody transfer, oil movement, fugitive emissions, Hydrocarbon management and quality predictions.

Webinar Director:

Dr. Suresh Agrawal President, Offsite Management Systems LLC

Dr. Agrawal has advanced degrees in Chemical Engineering from I.I.T's (India, USA). He has 30+ years of experience at senior technical /

management positions with international companies and has successfully managed and executed many advanced refinery offsite operation automation projects in numerous countries. He has published and presented 30+ papers in international publications and conferences in the areas of refinery offsite operations automation. He has also acted as a consultant to a number of refining and process industries worldwide, and delivers training seminars in the areas of his expertise.
