

<u>The Management and Automation of</u> <u>Oil Movement and Storage in a Refinery</u>

When: December 3, 2015 Time: 10 -11 AM CST (Houston, USA)

What you will learn:

- Oil movement Activities
- Automation of OM&S
- Economics of OM&S
- Roles and Responsibilities
- Fenceline activities and custody transfer
- Role of OM&S in the Hydrocarbon Management (HM)

Who Should Attend:

The webinar is aimed at and is suitable for:

- Offsite Operations Managers
- Offsite Engineers / Operators
- Control System Engineers

Free Webinar but seats are limited.

The most manpower intensive and time consuming activities in a refinery are to move feeds and products within and in/out of a refinery. They movements may be as much as 150+ per day involving hundreds of pumps. Valves and switches to make them safe and efficient operations. Modern refineries have automated these operations using sophisticated software and upgraded modern equipment to work with these automation software.

This webinar will discuss all technical aspects of oil movement and storage, economics, project execution phases and most importantly its role in over-all yield accounting process.

Webinar Director:

Dr. Suresh Agrawal President, Offsite Management Systems LLC

Dr. Agrawal has advanced degrees in Chemical Engineering from I.I.T's (India, USA). He has 30+ years of experience at senior technical /

management positions with international companies and has successfully managed and executed many advanced refinery offsite operation automation projects in numerous countries. He has published and presented 30+ papers in international publications and conferences in the areas of refinery offsite operations automation. He has also acted as a consultant to a number of refining and process industries worldwide, and delivers training seminars in the areas of his expertise.
